Black out

You know you're in for a treat as soon as you see it.
Sleek, but discreet. Packed with clever technology.
Glistening like a Steinway grand.

Press 'play', and the room comes alive. And so do your senses.
You're plunged into a 3-D soundscape of extraordinary depth
and textural detail.

Black is back

You're in the world of KEF instant theatre - the complete
DVD-based 5.1 digital entertainment system that's specifically
designed to match new style flat screen TVs. Powerful enough
to make your heart soar, and sensitive enough to hear
a pin drop.

Black magic - and everything you need in one box.

Identical effects speakers front and rear, matched to a centre channel that captures the human voice like no other. A slim DVD player, and a hide-away subwoofer with sophisticated power amplifiers. And because of KEF's uniquely advanced speaker technology, you're surrounded by the same spacious and dynamic sound image wherever you sit.

Black is beautiful.

Movies or music, you experience exactly what the original artists intended. No more, no less. And with a high performance DVD player that automatically configures itself for whatever DVD or CD you put in and a full-function remote, you'll find the system as easy to use as it is to set up.

Black is black

Black and white

Slender columns of pure sound, dispersed evenly throughout the room. Whether you choose the optional adjustable shelf stands or the neatly cable-managed floor stands, the look is strikingly clean and uncluttered. Like the sound: smooth, fluid and satisfying.

Black velvet.

Compromise has no place in home entertainment, and the new KEF instant theatre is designed for the way we live now. Easy to use. Refined. Accessible - an indulgence in pleasure, with the power to give you a real high.

High gloss. High fidelity. High style.

KEF Uni-Q®

Originally developed for KEF's legendary high end loudspeakers, the Uni-Q concept uses aerospace materials to create a tweeter small enough to mount in the centre of the bass/midrange driver so that both act as a single point source. This disperses the sound over a much wider area, so everyone in the room enjoys the same clear, warm, realistic sound instead of just in the small 'sweet spot' you get with conventional speakers.

DVD/CD player/tuner

Whatever you play - DVDs, CDs, SVCDs, VCDs or MP3s, the compact head unit automatically recognises what you load. As well as the benefit of Dolby Digital and DTS decoding for DVDs, Dolby Pro Logic II gives surround sound from any other equipment you play through the system. With clear displays and intuitive controls, the unit also houses an AM/FM radio with RDS and sleep functions.

Inert aluminium enclosures

The distinctive elliptical speaker enclosures are precision engineered from acoustically inert extruded aluminium to prevent cabinet vibrations and internal resonances from interfering with the purity of the sound. KEF's ingenious concealed wall brackets simplify wall mounting, and optional full-length floor stands are available in addition to adjustable shelf or the standard desktop stands.

Big bass

You need hefty bass punch to bring out the best in dramatic movie effects. With on-board amps for all channels flanking a large diameter side-firing bass driver, the omni-directional subwoofer adds real weight and physical impact to a sound image that surrounds you. Discreetly finished in matt black, it can be placed out of sight - even behind the TV or next to a wall.

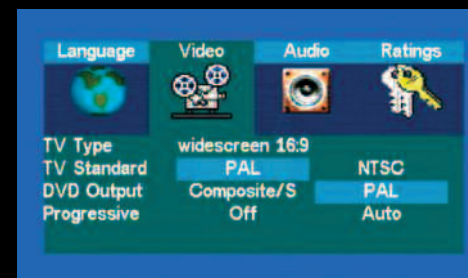

Easy to set up

It's called KEF instant theatre for a reason: the system is designed to be so easy to set up that you can experience the full benefit of 5.1 digital surround sound in a matter of minutes. All you have to do is plug in the subwoofer and connect four other cables, all of which are supplied. All that's left is to switch on, load your disc and enjoy.

Remote control

A full-function remote gives you complete control over your entertainment without leaving the sofa. Although the standard presets are suitable for most rooms, you can easily customise the settings to suit your own personal preferences via the remote control, using clear colourful on-screen menus.

Pause for reflection

specifications

KIT200 SPEAKERS

Design	Three way closed box
Drive units	1 x 75mm (3in.) Uni-Q®, 15mm (0.6in.) aluminium HF 2 x 75mm (3in.) LF
Crossover Frequencies	800Hz - 5kHz
Frequency Range (± 3dB)	95Hz - 30kHz
Sensitivity (2.83V / 1m)	87dB
Maximum Output	106dB SPL @ 1m
Impedance	8Ω
Net Weight	2kg (4.4lbs)
Dimensions Satellite (H x W X D)	419 x 88 x 127 mm 16.5 x 3.5 x 5.0 in.
Dimensions Centre (H x W X D)	88 x 419 x 127 mm 3.5 x 16.5 x 5.0 in.
